Job Posting

Company Overview:

LiberAte is poised to disrupt the restaurant industry by changing the way people find food and how restaurants satisfy their customers. The team has successfully completed a CSA approved incubator, the University of Toronto Hatchery, and is now looking to expand. LiberAte is a free market inspired mobile information company that specializes in business analytics for small to mid-size restaurants operating in the price conscious market space. To our users, we supply a universal, crowdsourced menu of all the restaurants in a given area, complete with accurate prices and item-by-item reviews allowing people to find the best deal. Using our database, we are able to execute price comparison for an item across all the different providers, showing users the best price and value, as well as perform intelligent searches for the specific food a user wants to eat. To our restaurant subscribers, we provide business analytics uniquely structured on an item-by-item basis.

Position Overview:

We are looking for an experienced and proven full-stack developer who shares our passion for good food, smart spending, and wants to get in on the ground floor of an exciting business opportunity with large upside potential. With this position, you have the opportunity to join a fast-paced, high-energy, and high structured team that thinks big and has the skillset and expert backing to execute industry-disrupting ideas. In this role, you will have the opportunity to put your extensive software development skills to the test, challenge yourself, innovate, create, and be part of the startup responsible for the next big thing to hit the restaurant industry.

Job Title:

Project Software Development Lead - Full Stack Developer

Location:

222 College Street, Suite 106 Toronto, ON M5T 3J1

Type:

Contract or Full-Time, Open to Negotiation.

Description Overview:

- Oversee, lead, code and strategize all technical development related to LiberAte
- Contribute to and assist in building technical specifications
- Supervise and assist in the production and hosting of a promotional multi-media website
- Participate in a fast paced work environment
- Lead the building of both the back-end and front-end of LiberAte's mobile application
- Execute successful deployment of final product to distribution channels on several mobile platforms
- Oversee all maintenance and operation of server and database

Basic Qualifications:

- 1-2 years of full-stack mobile application development in either Android or iOS
- 2+ years of study in computer science or similar field
- Proven portfolio with at least one successful (i.e. working front and back-end) mobile application

Preferred Qualifications:

- Java, HTML5, CSS, JavaScript, SQL, PHP, BootStrap, jQuery, Angular JS, jQuery mobile

Compensation:

LiberAte is a fast growing startup with a strong team, dedicated Board of Advisors, and industry experts with a validated business model and meticulously developed idea. LiberAte plans to execute rapidly and disrupt the entire restaurant industry. Newcomers are entitled to a combination of salary, paid contract-work, equity, and the opportunity to take on larger roles and advance to higher executive positions within the company. We are seeking passionate, spirited, entrepreneurial, smart risk takers with vision, talent, and quick thinking to join a promising venture on the ground floor. Contact us to learn more about what we are doing and see some helpful explanatory documentation. We are confident that you will share our optimism, excitement, and vision once you fully understand exactly what we are doing at LiberAte.
